

Supplementary Figure 3: Box plots of observed species and phylogenetic diversity estimates for the four primer pairs used in this study, 68f/518r, 341f/785r, 799f/1193r, 967f/1391r. Averages were calculated based on the non-normalized OTU-table. Different letters denote significant differences (Kruskal Wallis, $p < 0.05$).
